

HB 5412, supporting

I support this legislation. For too long, all residents that have contributed to the Clean Energy Funds have not shared in its benefits; namely the urban residents in distressed communities such as New Haven.

This bill will allow a more equitable distribution of these funds; we have all contributed to and deserve to receive the benefits of these funds. (Urban residents have contributed more than their fair share because they are more numerous and the contribution is just a flat fee assessed on all electric bills).

Thank you for allowing us to comment electronically.
